

TESTIMONIALS

Dale Steyn (SA Cricketer) -

"If I am on the cricket field or in the gym...I feel energized wearing TRION:Z"

The #1 Test Bowler in the World!

Denver Burns (Mr. South Africa 2010)

"A fabulous product which is effortless to wear and has helped me immensely with my I.T.B. to such an extent that it is now non-existent. I am very impressed"

Mrs. Bouwer (pensioner)

I am a 74 year old and had serious health problems during 2009. I have always suffered to a lesser degree to depression and high and lows. Have had serious digestive problems and have been wearing the Trion:z now for 3 weeks. I cannot explain the turnaround which has happened in my life. I have not been depressed – I have had no highs, my pancreatic digestive problems are a lot better. I have heaps of energy and absolutely feel like a new person. I do not know if it is perhaps another miracle or the Trion:z, but let us give the latter the praise (or benefit of the doubt)

Caroline Koll (SA Long course Triathlon Champion 2010)

"I was skeptical at first as to how a little bracelet could help my sports performance? Testing the TRION:Z has resulted in me adopting its benefits for now and the future!"

- I had more energy, even when I felt fatigued from training
- Increased power
- The ache from an old shoulder injury has faded significantly
- Seasonal sinus and allergies have lessened
- Sleeping well

Caroline is a professional triathlete and web designer.

She has raced at the highest level for more than a decade. She is the current 2010 South African Elite Long Distance Champion and also South African Elite Champion over the Olympic distance in 2003. She has achieved many podiums in international triathlons, and at Iron-Man South Africa, she has regularly been the top placed South African, including 5th place finish at the 2009 edition."

Lucille – PE

"We had workmen at our home this week and one of them was kind enough to liberate my Trion-Z band off my dressing table. As the week has progressed, my chronic headache which had been under control for six months, has returned with a vengeance, and the only thing I can attribute it to the fact that I am no longer wearing my stylish white Trion-Z band.

I can only wish the workman all of the worst for taking my valuable possession, but unfortunately, he will begin to feel great, the stiffness in his joints will subside, and he will begin to experience a feeling of overall wellbeing and improved concentration for as long as he wears my band. I guess that in this case, crime does pay!

Luckily tomorrow is payday, and I will be building the cost of a brand new white Trion-z band into my budget for the new month. This one will not be allowed to repose on my dressing table when I am washing dishes or in the shower. The criminals will have to cut my arm off to liberate it!"

Kevin Campbell PE

"Having played in mostly team sports on a competitive level, I was unfortunately sidelined by injury which led to a few knee operations and some weight gain over the years. So, I recently started cycling which I am thoroughly enjoying. We often cycle a scenic route along the Port Elizabeth coastline in a bunch that meet regularly, which I battle to keep pace with. I always wanted to do the smaller Corporate Iron-Man, but was nervous and scared. Having had almost no training, I entered the Corporate Iron-Man. I completed the whole event and I have to say that I felt great afterwards. Fellow friends and supporters were amazed in disbelief that I did what I did with almost no training. I firmly believe that TRION:Z made a huge contribution to that. Since wearing TRION:Z, I feel so much better and energetic and I have kept up to the bunch in cycling."
